## JJ (RoHS)

A few years back, until they were discontinued, high quality multi-tap capacitors were available from Mallory and Aero-M. Since then, only second-rate knock offs have been available at exorbitant prices. Now you can get the most popular multi-tap capacitor from a REAL capacitor manufacturer at reasonable prices.

“Although audiophiles will tell you that polystyrene caps have the best sound (and maybe they do for stereo systems), I prefer the polyester tubular foil capacitors as the ones sounding the most like vintage for guitar amps. These caps are the Mallory 150 series cap. They have a very similar sound to the vintage style paper caps.”
